EDUCATION

Universitas Tarumanagara

Bachelor of Computer Science (GPA = 3.82/4.00)

Aug 2022 – Present

Jakarta

EXPERIENCE

Software Developer Intern

Mitra Solusi Telematika (TMT Group)

Dec 2025 – Present

Jakarta

- Built a SharePoint integration service using Node.js with custom web frontend, enabling users to perform full CRUD operations on synced data without direct SharePoint access; designed custom RBAC system to eliminate manual Active Directory role management.
- Engineered ETL sync pipeline synchronizing databases via automated cronjobs, reducing data-entry errors and ensuring consistency across 80,000+ records for AI-based item classification workflows.
- Developed ASP.NET Core backend with SQL Server database to sync mobile servicemen field data to supervisor web app, supporting approvals, revisions, and real-time GPS/activity timeline visualization.

Teaching Assistant

Universitas Tarumanagara & Politeknik Negeri Media Kreatif

Aug 2025 – Present

Jakarta

- Taught lectures and labs across VR, Fundamental Programming, Mobile Programming, and Interactive Game Design; mentored 200+ students in Unity C# mobile and game development with hands-on production using Blender and Adobe Creative Suite.
- Major editor for SINTA 5 technical journal (JIKSI); ensured publication quality standards, redesigned logo/cover/website, and managed editorial roles and workflows.

Software Developer Intern

BDO in Indonesia (BDO Global)

Jan 2025 – Jun 2025

Jakarta

- Migrated 37 REST APIs from Node.js to Go with Redis caching, reducing supervisor data-load latency by 70× (3500ms → 50ms) and cutting infrastructure costs.
- Architected containerized deployment pipeline using Docker, Traefik, and GitHub Actions, automating CI/CD and replacing manual local deployments.
- Built 2D Unity-based training simulator for IT auditors to experience real-world audit scenarios (compliance interviews, risk assessments) before field engagement.

PROJECTS

Physics-Based Active Ragdoll Prototype | *Unity, C#, ConfigurableJoint, Physics, IK*

2025

- Built a physics-based active ragdoll prototype using torque-driven ConfigurableJoints for stable, natural motion without animation blending.
- Implemented custom FABRIK inverse kinematics and real-time balance correction using center-of-mass and foot placement heuristics.

Distributed Key-Value Store | *Rust, Tokio, Raft*

2025

- Implemented the Raft consensus algorithm from scratch to maintain consistency and leader election under network partitions.
- Built a fault-tolerant async key-value store using Tokio with log replication and snapshotting for storage compaction.

TECHNICAL SKILLS

Languages: Go, Rust, C#, TypeScript, Java, Python

Frameworks & Platforms: ASP.NET Core, React, TailwindCSS, Unity, PostgreSQL, SQL Server, MongoDB, Redis

Cloud & DevOps: Azure, AWS, Docker, GitHub Actions, Linux

AWARDS & CERTIFICATIONS

COMPFEST 2024 — Best Artistic Award

Oct 2024

Unity Certified Associate: Game Developer

Dec 2025 – Dec 2028

Huawei HCIA-AI Certification

Jun 2023 – Jun 2026
