EDUCATION

Universitas Tarumanagara

Aug 2022 – Jul 2026

Bachelor of Computer Science (3.99/4.00)

Jakarta

- Mentored 200+ students as Teaching Assistant across 5 courses (VR, Programming, Mobile, Game Design) while serving as journal editor for SINTA 5-indexed journal (JIKSI), managing submissions, citations, and formatting.
- Awarded Best Thesis (Skripsi Terbaik Pertama) for a Game Development thesis, outcompeting AI, Data Science, and other CompSci research tracks.

EXPERIENCE

Software Engineer

Dec 2025 – Present

Mitra Solusi Telematika (TMT Group)

Jakarta

- Architected Node.js service syncing PostgreSQL database with SharePoint files via MS Graph API and MSAL app-only auth, eliminating frontend token exposure; integrated with RPA/Power Automate workflows and configured Entra ID conditional access policies securing 200+ users.
- Optimized .NET dashboard performance by batching 40+ sequential DB queries into 8 round-trips, reducing page load from ~60s to ~4s (15× faster, 80% fewer DB calls).
- Resolved legacy 64GB table bloat caused by SHE duplicate records through backend refactoring and thorough SQL Server data cleansing, reducing table size from 64GB to 300MB (99.5% reduction).

Software Engineer Intern

Jan 2025 – Jun 2025

BDO in Indonesia (BDO Global)

Jakarta

- Migrated 37 REST APIs from Node.js to Go with Redis caching, cutting API latency from 3500ms to 50ms (70× faster) and reducing infrastructure costs.
- Architected containerized CI/CD pipeline using Docker, Traefik, and GitHub Actions, cutting deployment time from 3+ minutes to under 10 seconds (18× faster).
- Built 2D Unity training simulator used by 100+ IT auditors to practice real audit scenarios in a risk-free sandbox.

PROJECTS

Physics-Driven Character Controller | *Unity, C#, Physics, Inverse Kinematics*

2025

- Engineered a physics-driven character controller with realistic full-body balance, reactive motion, and terrain adaptation, with no pre-baked animations required.
- Implemented custom inverse kinematics solver for real-time foot and limb placement, enabling stable traversal across uneven surfaces and dynamic obstacles.

Distributed Key-Value Store | *Rust, Tokio, Raft*

2025

- Implemented the Raft consensus algorithm from scratch to maintain consistency and leader election under network partitions.
- Built a fault-tolerant async key-value store using Tokio with log replication and snapshotting for storage compaction.

TECHNICAL SKILLS

Languages: Go, Rust, C#, TypeScript, Java, Python

Frameworks: Node.js, ASP.NET Core, React, Next.js, TailwindCSS, Unity

Databases: PostgreSQL, SQL Server, MongoDB, Redis

Cloud & DevOps: Azure, AWS, Docker, GitHub Actions, Linux, MS Entra ID

AWARDS & CERTIFICATIONS

Best Thesis Award — FTI Universitas Tarumanagara

Jul 2026

Unity Certified Associate: Game Developer

Dec 2025

COMPFEST 16 — Indie Game Ignite: Best Artistic Award

Oct 2024
