EDUCATION

Universitas Tarumanagara

Bachelor of Computer Science (GPA = 3.82/4.00)

Aug 2022 – Present

West Jakarta

EXPERIENCE

Software Developer Intern

Mitra Solusi Telematika

Dec 2025 – Present

South Jakarta

- Developed a SharePoint file-management service using Microsoft Graph API (Node.js/TypeScript), supporting programmatic CRUD, streaming downloads, and safe move/rename/copy operations across nested folder hierarchies.
- Engineered a Node.js ETL sync pipeline handling 80,000+ records between Azure SQL and Aurora PostgreSQL, using per-record transactional upserts, field-level change detection, automated HS-code history tracking, and idempotent downstream queue insertion.
- Implemented authentication and authorization using Microsoft Entra ID (OAuth2) and JWT validation, designing a custom RBAC system to enforce granular, role-based data access.

Teaching Assistant (Programming & Game Development)

Universitas Tarumanagara & Polimedia

Aug 2025 – Present

West & South Jakarta

- Assisted lectures and led lab sessions for Virtual Reality, Fundamental Programming, Mobile Programming, and Interactive Game Design courses across two institutions.
- Mentored 200+ students across multiple semesters in Unity (C#)-based mobile and game development, covering gameplay systems, UI, deployment workflows, and applied production using Blender and Adobe Creative tools.
- Served as assistant editor for multiple volumes of JIKSI and supported academic competitions as a technical assistant and judge.

Software Developer Intern

BDO in Indonesia

Jan 2025 – Jun 2025

West Jakarta

- Engineered a high-throughput, low-latency backend by migrating 37 REST APIs from Node.js to Go, achieving a 70× latency reduction (3500ms → 50ms) with Redis caching.
- Designed and deployed containerized monoliths on an Ubuntu VPS using Docker, Traefik reverse proxy, and GitHub Actions to automate build and deployment workflows.
- Developed a 2D Unity-based ITGC training simulator simulating 14+ real-world audit risk scenarios.

PROJECTS

Physics-Based Active Ragdoll Prototype | *Unity, C#, ConfigurableJoint, Physics, IK*

2025

- Built a physics-based active ragdoll prototype using torque-driven ConfigurableJoints for stable, natural motion without animation blending.
- Implemented custom FABRIK inverse kinematics and real-time balance correction using center-of-mass and foot placement heuristics.

Distributed Key-Value Store | *Rust, Tokio, Raft*

2025

- Implemented the Raft consensus algorithm from scratch to maintain consistency and leader election under network partitions.
- Built a fault-tolerant async key-value store using Tokio with log replication and snapshotting for storage compaction.

TECHNICAL SKILLS

Languages: Go, Java, Rust, C++, C#, PHP, Python

Frameworks & Tools: React, TailwindCSS, Unity, Spring Boot, Node.js, Laravel, .NET

Databases: PostgreSQL, MySQL, SQL Server, MongoDB

Cloud & DevOps: AWS, Azure, Docker, VPS (Linux), GitHub Actions, Traefik, Prometheus, Grafana

AWARDS & CERTIFICATIONS

COMPFEST 2024 — Best Artistic Award	Oct 2024
Unity Certified Associate: Game Developer	Dec 2025 – Dec 2028
Huawei HCIA-AI Certification	Jun 2023 – Jun 2026
