EDUCATION

Universitas Tarumanagara

Jakarta

Bachelor of Computer Science

Aug 2022 – Jul 2026

- CGPA: 3.99/4.00
- Best Thesis Award
- Relevant Coursework: Backend Programming, Artificial Intelligence, Computation I/II, Database Systems

EXPERIENCE

MST (Mitra Solusi Telematika)

Jakarta

Software Engineer | .NET, Node.js, Next.js, Azure, AWS, IIS

Dec 2025 – Present

- Architected Node.js service syncing PostgreSQL with SharePoint via MS Graph and MSAL auth; integrated with Power Automate workflows and configured Entra ID conditional access policies securing 200+ users.
- Optimized .NET performance by batching 40+ sequential DB queries into 8 round-trips, reducing page load from ~60s to ~2s (30× faster, 80% fewer DB calls).
- Resolved legacy 64GB table bloat caused by SHE duplicate records through backend refactoring and thorough SQL Server data cleansing, reducing table size from 64GB to 300MB (99.5% reduction).

BDO (Binder Dijker Otte)

Jakarta

Software Engineer Intern | Go, Node.js, Next.js, Linux, GitHub Actions, Docker

Jan 2025 – Jun 2025

- Migrated 30+ APIs from Node.js to Go with Redis, cutting latency from ~3500ms to ~50ms (70× faster), reducing infrastructure costs.
- Architected containerized CI/CD pipeline using Docker, Traefik, and GitHub Actions, cutting deployment time from 3+ minutes to under 10 seconds (18× faster).
- Built 2D Unity training simulator to practice real audit scenarios in a risk-free sandbox.

Universitas Tarumanagara & Polimedia

Jakarta

Teaching Assistant | Java, C++, C#, Unity, Blender, Adobe, Peer Review & Editorial

Aug 2025 – Jul 2026

- Delivered technical instruction across 5 CS courses (Fundamental Programming, Mobile Programming, Interactive Game Design, Virtual Reality, Data Structures) to 200+ students, mentoring in Unity/C# and software development workflows.
- Evaluated 150+ scientific journal submissions for JIKSI (SINTA 5-indexed journal), auditing code quality, system architecture, and research methodology against publication standards.

PROJECTS

Physics-Driven Character Controller | *Unity, C#, Physics, Inverse Kinematics*

2025

- Engineered a physics-driven character controller with realistic full-body balance, reactive motion, and terrain adaptation, with no pre-baked animations required.
- Implemented custom inverse kinematics solver for real-time foot and limb placement, enabling stable traversal across uneven surfaces and dynamic obstacles.

TECHNICAL SKILLS

Languages: Go, Rust, C#, TypeScript, Java, Python

Frameworks: Node.js, ASP.NET Core, React, Next.js, TailwindCSS, Unity

Databases: PostgreSQL, SQL Server, MongoDB, Redis

Cloud & DevOps: Azure, AWS, Docker, GitHub Actions, Linux, MS Entra ID

AWARDS & CERTIFICATIONS

Best Thesis Award — FTI Universitas Tarumanagara

Jul 2026

Unity Certified Associate: Game Developer

Dec 2025

COMPFEST 16 — Indie Game Ignite: Best Artistic Award

Oct 2024
